

A man of faith, vision and hope - but a

man: Christian role for 80's? Industrialists' reaction to question - "what is needed to-day?"

(1) Faith - Changing world & society. Values. Inside society. Economic miracle? (under-employment. Monetary policies. What is left? Man of faith & love - can add much needed dimension to life.

(2) Vision - This is what separates 'giants' from those who merely travel through life. "To look to the far mountain top & yet not lose the common touch."

(3) Hope - Society needs this more than anything else. Christian must be the prophet of hope.

"... but a man..."

Sometimes tight Churchmen, Soldieriness synonymous with something less than true manhood.

Nothing further from truth of J.C.

Himself. Nothing apologetic abd. thin.

Poss. to be in world but not of the

world. Value of contribution to be made to

Church by men who daily 'fettle life'

problems, - yet come out on top bec. of

their faith. Tried & tested but not

found wanting... Note of C1775
